

## About Deskfactors Inc., & BlueSecures.com

Deskfactors Inc (Deskfactors.com) is a series seed funded, Santa Clara, CA, US head-quartered company with development centre in Bangalore, India. The company is developing BlueSecures.com, a B2B SaaS product for the global market using encryption and deep technology at its core.

*BlueSecures.com* is secure messaging (and audio, video calling) for businesses and works on both mobile and desktop mediums. Its key differentiators are -

1. Businesses can instantly connect, message and call - employees, customers, suppliers..
2. Save & secure your business data
3. Businesses own their data and users access data only with permissions.
4. Admin controls help to access, manage data, storage, users & subscription.
5. BlueSecures can easily integrate with existing CRM, HRM, SRM software.

Simply put, *“Like business email, BlueSecures is business messaging”*.

Any business, whether a sole-proprietorship, or an SMB or an enterprise can simply download the product from play store or app-store and start working. In 5 minutes and 5 steps, one can start messaging and calling. The simplicity of design makes it highly adoptable.

The product comes in-built with data security layers and instant market connectivity enabling *businesses to sell more and service better*.

Imagine driving an electric vehicle and not worry about charging it.  
Businesses are always on! That is what our logo represents.

*The idea is to change how businesses secure data, sell more and service better!*
